

Best Practice ensures that...

You and your family are at the centre of your child's development.

You and other important people gain skills and knowledge to help support your child.

Everyday places and routines are used to build your child's skills.

A team is formed to support your child.

What is Best Practice in Early Childhood Intervention (ECI)?

Best Practice in ECI guides the way professionals work with your child and family.

It produces the best outcomes for children with disabilities and developmental delays.
